

Teaching as a Profession WORKING WITH SPECIAL NEEDS

DIRECTIONS: This month you will be researching methods to use when working with children with special needs.

You may either complete a PowerPoint, a brochure, or a Word document with the required material for this assignment.

Requirements:

- Define (and within the definition distinguish between) interventions, accommodations, and modifications.
- For each (interventions, accommodations, and modifications), include at least **5** examples of each. For example, an accommodation may be extended time on assignments and tests.
- Works Cited page listing resources used for this assignment. Works Cited page should be in MLA format.

No matter which output option you choose, take the stand point that you are teaching future educators the difference between these terms as they encounter these throughout their teaching careers.

Be professional in your design, but use some color and images that may help explain some of your examples.
